

PXW

In Wall Inert Gas Extract Unit

The PXW In Wall Inert Gas Extract range is designed to provide combined pressure relief and gas extraction for inert gas. These easy to install units offer a cost effective solution for post discharge gas extraction.

Each unit includes a 4-hour rated AFP SHX-UN pressure relief vent as standard, a DUX two way pressure relief vent can be provided upon request, the additional free vent area of the pressure relief vent can be factored into the enclosure's overall requirement. The unit is supplied in kit form for fitting at low or high level within the risk.

Additional standard DUX or SHX pressure vents can be supplied for fresh air makeup.

Product Specification

Product Code	PXW300	PXW500
Free Vent Area	0.077m ²	0.212m ²
Extraction Per Hour	3600m ³	6480m ³
Overall WxHxD	550x550x380mm	660x660x380mm
Hole cut out WxH	360x350mm	560x550mm
Weight	29.5kg	54kg

Product Information

- Steel powder coated construction RAL 9010 White
- Manufactured to ISO9001
- The products carry a 5-year guarantee and are available ex-stock with lead time of 2 working days if ordered before 12 pm
- The PXW comes with wall liner, wall liner extension, Helios SPW fan, KAC call point key switch and external gravity louvre.
